

GSM ALARM SYSTEM

GSM Alarm Solution

Hybrid technology

Adopts both wired and wireless technology, the wireless alarm can save tremendous amounts of money and time on system installation.

Easy to expand

The alarm system is capable of operating with 30 wireless zones, it totally can work with up to 116 units wireless sensors (including intrusion sensors, PIR sensors, glass break sensors). The alarm system can work with more than 8 units extra key fobs or keypad for remote Arm/Disarm the alarm system.

Central monitoring

GSM alarm system can send text message (SMS) to mobile phone numbers, the test message includes alarm types, alarm time, zone number information and thereby identify the zone in which it was triggered.

Key features

- Internal GSM antenna design
- Dual transmission network (GSM and PSTN)
- Three arm and disarm modes
- 30 wireless zones and 8 optional hard wired zones.
- Maximum support 116 units wireless sensors.
- Preset 5 phone numbers for alarm receiving
- Built-in Microphone, remote voice monitoring
- Inbuilt siren.
- Remote arm and disarm feature.
- Set off alarm.
- Reset function design
- Backup rechargeable battery, last more than 8 hours
- Wide angle wireless PIR sensor
- Anti-white light, RF interference design
- Alarm delay setting, LED ON/OFF setting
- Wall mount installation bracket included.
- Wireless technology-433MHz,100 meters
- 9V battery with an average battery life of more than a year.
- Serves as a reliable perimeter protection system.
- Equipped with a 110DB strobe siren with a strobe alarm light.
